PROJECTS

1)Blood Bank Management System – BLOOD BEE

- Built a web platform to connect blood donors and recipients efficiently.
- Implemented secure registration, real-time donor matching, and emergency alerts.
- Designed hospital dashboard for tracking requests and donor availability.

2)ML-based Demand Prediction System

- Developed a machine learning model to forecast product demand, helping producers decide optimal production units.
- Implemented data preprocessing, feature engineering, and regression algorithms for accurate predictions.
- Improved resource planning and reduced overproduction through data-driven insights.

3)Region-based Agri Supporter

- Built a platform to assist farmers with region-specific facilities and resources.
 - Integrated location-based services to recommend nearby support centers, subsidies, and tools.
 - Enhanced agricultural decision-making through tailored regional insights.
